Personally-owned iPad charter

BYOiPad overview

Bring Your Own ‘iPad’ (BYOiPad) is a new pathway supporting the delivery of 21st century learning at Lockyer District High School (LDHS). It is a term used to describe the device ownership where students use their personally-owned iPad to access the department’s information and communication (ICT) network.

At Lockyer District High School we decided on Bring Your Own ‘iPad’ (BYOiPad). Access to the department’s ICT network is provided only if the mobile device meets the department’s security requirements which, at a minimum, requires that anti-virus software has been installed, is running and is kept updated on the device Advice for State Schools on Acceptable use of ICT Facilities and Devices.

Students are responsible for the security, integrity, insurance and maintenance of their personal mobile devices and their private network accounts.

The BYOiPad acronym used by Lockyer District High School refers to the teaching and learning environment in our school where personally-owned iPads are used.

LDHS has carried out extensive BYOiPad research within Queensland state schools. The research built on and acknowledged the distance travelled in implementing 1-to-1 device to student ratio classes across the state, and other major technology rollouts.

We have chosen to support the implementation of a BYOiPad model because:

- BYOiPad recognises the demand for seamless movement between school, work, home and play
- our BYOiPad program assists students to improve their learning outcomes in a contemporary educational setting
- assisting students to become responsible digital citizens enhances the teaching learning process and achievement of student outcomes as well as the skills and experiences that will prepare them for their future studies and careers.
iPad selection

Before acquiring a device to use at school the parent or caregiver and student should be aware of the school’s specification of appropriate device type, operating system requirements and software. These specifications relate to the suitability of the device enabling class activities, meeting student needs and promoting safe and secure access to the department’s network.

The school’s BYOiPad program supports printing, filtered internet access, and some file access and storage through the department’s network while at school.

However, the school’s BYOiPad program does not include school technical support or charging of devices at school.

Device care

The student is responsible for taking care of and securing their iPad and accessories in accordance with school policy and guidelines. Responsibility for loss or damage of a device at home, in transit or at school belongs to the student. Advice should be sought regarding inclusion in home and contents insurance policy.

It is advised that accidental damage and warranty policies are discussed at point of purchase to minimise financial impact and disruption to learning should a device not be operational.

General precautions

- Food or drink should never be placed near the device.
- Plugs, cords and cables should be inserted and removed carefully.
- Devices should be carried within their protective case where appropriate.
- Ensure the battery is fully charged each day.
- Turn the device off before placing it in its bag.

Protecting the screen

- Avoid poking at the screen — even a touch screen only requires a light touch.
- Avoid placing anything in the carry case that could press against the cover.
- Only clean the screen with a clean, soft, dry cloth or an anti-static cloth.
- Don’t clean the screen with a household cleaning product.
Data security and back-ups

Students must ensure they have a process of backing up data securely. Otherwise, should a hardware or software fault occur, assignments and the products of other class activities may be lost.

The student is responsible for the backup of all data. While at school, students may be able to save data to the school’s network, which is safeguarded by a scheduled backup solution. All files must be scanned using appropriate anti-virus software before being downloaded to the department's ICT network.

Students are also able to save data locally to their device for use away from the school network. The backup of this data is the responsibility of the student and should be backed-up on an external device, such as an external hard drive or USB drive.

Students should also be aware that, in the event that any repairs need to be carried out the service agents may not guarantee the security or retention of the data. For example, the contents of the device may be deleted and the storage media reformatted.

Acceptable personal mobile device use

Upon enrolment at LDHS, parental or caregiver permission is sought to give the student(s) access to the internet, based upon the policy contained within the Acceptable Use of the Department’s Information, Communication and Technology (ICT) Network and Systems.

This policy also forms part of this Student iPad Charter. The acceptable-use conditions apply to the use of the device and internet both on and off the school grounds.

Communication through internet and online communication services must also comply with the school's Responsible Behaviour Plan available on the school website.

- While on the school network, students should not: create, participate in or circulate content that attempts to undermine, hack into and/or bypass the hardware and/or software security mechanisms that are in place
- disable settings for virus protection, spam and/or internet filtering that have been applied as part of the school standard
- use unauthorised programs and intentionally download unauthorised software, graphics or music
- intentionally damage or disable computers, computer systems, school or government networks
- use the device for unauthorised commercial activities, political lobbying, online gambling or any unlawful purpose.

Note: Students' use of internet and online communication services may be audited at the request of appropriate authorities for investigative purposes surrounding inappropriate use.

Passwords

Use of the school's ICT network is secured with a user name and password. The password must be difficult enough so as not to be guessed by other users and is to be kept private by the student and not divulged to other individuals (e.g. a student should not share their username and password with fellow students).

The password should be changed regularly, as well as when prompted by the department or when known by another user.
Personal accounts are not to be shared. Students should not allow others to use their personal account for any reason.

Students should log off at the end of each session to ensure no one else can use their account or device. Students should also set a password for access to their BYOiPad device and keep it private.

Parents/caregivers may also choose to maintain a password on a personally-owned device for access to the device in the event their student forgets their password or if access is required for technical support. Some devices may support the use of parental controls with such use being the responsibility of the parent/caregiver.

**Digital citizenship**

Students should be conscious creators of the content and behaviours they exhibit online and take active responsibility for building a positive online reputation. They should be conscious of the way they portray themselves, and the way they treat others online.

Students should be mindful that the content and behaviours they have online are easily searchable and accessible. This content may form a permanent online record into the future.

Interactions within digital communities and environments should mirror normal interpersonal expectations and behavioural guidelines, such as when in a class or the broader community.

Parents are requested to ensure that their child understands this responsibility and expectation. The school’s Responsible Behaviour Plan also supports students by providing school related expectations, guidelines and consequences.

**Cybersafety**

If a student believes they have received a computer virus, spam (unsolicited email), or they have received a message or other online content that is inappropriate or makes them feel uncomfortable, they must inform their teacher, parent or caregiver as soon as is possible.

Students must also seek advice if another user seeks personal information, asks to be telephoned, offers gifts by email or asks to meet a student.

Students must never initiate or knowingly forward emails, or other online content, containing:

- a message sent to them in confidence
- a computer virus or attachment that is capable of damaging the recipients’ computer
- chain letters or hoax emails
- spam (such as unsolicited advertising).

Students must never send, post or publish:

- inappropriate or unlawful content which is offensive, abusive or discriminatory
- threats, bullying or harassment of another person
- sexually explicit or sexually suggestive content or correspondence
- false or defamatory information about a person or organisation.

Parents, caregivers and students are encouraged to read the department’s [Cybersafety and Cyberbullying guide for parents and caregivers](#).
Web filtering

The internet has become a powerful tool for teaching and learning, however students need to be careful and vigilant regarding some web content. At all times students, while using ICT facilities and devices, will be required to act in line with the requirements of the school’s Responsible Behaviour Plan. To help protect students (and staff) from malicious web activity and inappropriate websites, the school operates a comprehensive web filtering system. Any device connected to the internet through the school network will have filtering applied.

The filtering system provides a layer of protection to staff and students against:

- inappropriate web pages
- spyware and malware
- peer-to-peer sessions
- scams and identity theft.

This purpose-built web filtering solution takes a precautionary approach to blocking websites including those that do not disclose information about their purpose and content. The school’s filtering approach represents global best-practice in internet protection measures. However, despite internal departmental controls to manage content on the internet, illegal, dangerous or offensive information may be accessed or accidentally displayed. Teachers will always exercise their duty of care, but avoiding or reducing access to harmful information also requires responsible use by the student.

Students are required to report any internet site accessed that is considered inappropriate. Any suspected security breach involving students, users from other schools, or from outside the Queensland DETE network must also be reported to the school.

The personally-owned devices have access to home and other out of school internet services and those services may not include any internet filtering. Parents and caregivers are encouraged to install a local filtering application on the student’s device for when they are connected in locations other than school. Parents/caregivers are responsible for appropriate internet use by students outside the school.

Parents, caregivers and students are also encouraged to visit the Australian Communications and Media Authority’s CyberSmart website for resources and practical advice to help young people safely enjoy the online world.

Privacy and confidentiality

Students must not use another student or staff member’s username or password to access the school network or another student’s device, including not trespassing in another person’s files, home drive, email or accessing unauthorised network drives or systems.

Additionally, students should not divulge personal information via the internet or email, to unknown entities or for reasons other than to fulfil the educational program requirements of the school. It is important that students do not publish or disclose the email address of a staff member or student without that person’s explicit permission. Students should also not reveal personal information including names, addresses, photographs, credit card details or telephone numbers of themselves or others. They should ensure that privacy and confidentiality is always maintained.
**Intellectual property and copyright**

Students should never plagiarise information and should observe appropriate copyright clearance, including acknowledging the original author or source of any information, images, audio etc. used. It is also important that the student obtain all appropriate permissions before electronically publishing other people’s works or drawings. The creator or author of any material published should always be acknowledged. Material being published on the internet or intranet must have the approval of the principal or their delegate and have appropriate copyright clearance.

Copying of software, information, graphics or other data files may violate copyright laws without warning and be subject to prosecution from agencies to enforce such copyrights.

**Apps**

Schools may recommend apps in order to meet the curriculum needs of particular subjects. Parents/caregivers may be required to install and support the appropriate use of the apps in accordance with guidelines provided by LDHS. This includes the understanding that apps may need to be removed from the iPad upon the cancellation of student enrolment, transfer or graduation.

**Monitoring and reporting**

Students should be aware that all use of internet and online communication services can be audited and traced to the account of the user.

All material on the device is subject to audit by authorised school staff. If at any stage there is a police request, the school may be required to provide the authorities with access to the device and personal holdings associated with its use.

**Misuse and breaches of acceptable usage**

Students should be aware that they are held responsible for their actions while using the internet and online communication services. Students will be held responsible for any breaches caused by other person(s) knowingly using their account to access internet and online communication services.

The school reserves the right to restrict/remove access of personally owned iPads to the intranet, internet, email or other network facilities to ensure the integrity and security of the network and to provide a safe working and learning environment for all network users. The misuse of personally owned iPads may result in disciplinary action which includes, but is not limited to, the withdrawal of access to school supplied services.
Responsible use of BYOiPad

Our goal is to ensure the safe and responsible use of facilities, services and resources available to students through the provision of clear guidelines.

Responsibilities of stakeholders involved in the BYOiPad program:

**Lockyer District High School**
- BYOiPad program induction — including information on (but not responsible for) connection, care of device at school, workplace health and safety, appropriate digital citizenship and cybersafety
- network connection at school
- internet filtering (when connected via the school's computer network)
- some technical support (please consult Technical support table below)
- some school-supplied apps e.g. Microsoft Office 365 …
- printing facilities
- school representative signing of BYOiPad Charter Agreement.

**Student**
- participation in BYOiPad program induction
- acknowledgement that core purpose of device at school is for educational purposes
- care of device
- appropriate digital citizenship and online safety (for more details, see [ACMA CyberSmart](#))
- security and password protection — password must be difficult enough so as not to be guessed by other users and is to be kept private by the student and not divulged to other individuals (e.g. a student should not share their username and password with fellow students)
- some technical support (please consult Technical support table below)
- maintaining a current back-up of data
- charging of device
- abiding by intellectual property and copyright laws (including software/media piracy)
- internet filtering (when not connected to the school’s network)
- ensuring personal login account will not be shared with another student, and device will not be shared with another student for any reason
- understanding and signing the BYOiPad Charter Agreement.

**Parents and caregivers**
- participation in BYOiPad program induction
- acknowledgement that core purpose of device at school is for educational purposes
- internet filtering (when not connected to the school’s network)
- encourage and support appropriate digital citizenship and cybersafety with students (for more details, see [ACMA CyberSmart](#))
- some technical support (please consult Technical support table below)
- required software, including sufficient anti-virus software
- protective backpack or case for the device
- adequate warranty and insurance of the device
- understanding and signing the BYOiPad Charter Agreement.

The following are examples of responsible use of devices by students:

- Use mobile devices for:
  - engagement in class work and assignments set by teachers
  - developing appropriate 21st Century knowledge, skills and behaviours
  - authoring text, artwork, audio and visual material for publication on the Intranet or Internet for educational purposes as supervised and approved by school staff
  - conducting general research for school activities and projects
  - communicating or collaborating with other students, teachers, parents, caregivers or experts as part of assigned school work
  - accessing online references such as dictionaries, encyclopaedias, etc.
  - researching and learning through the school’s eLearning environment
  - ensuring the device is fully charged before bringing it to school to enable continuity of learning.

- Be courteous, considerate and respectful of others when using a mobile device.
- Switch off and place out of sight the mobile device during classes, where these devices are not being used in a teacher directed activity to enhance learning.
- Use the personal mobile device for private use before or after school, or during recess and lunch breaks.
- Seek teacher’s approval where they wish to use a mobile device under special circumstances.
The following are examples of irresponsible use of devices by students:

- using the device in an unlawful manner
- creating, participating in or circulating content that attempts to undermine, hack into and/or bypass the hardware and/or software security mechanisms that are in place
- downloading (or using unauthorised apps for), distributing or publishing of offensive messages or pictures
- using obscene, inflammatory, racist, discriminatory or derogatory language
- using language and/or threats of violence that may amount to bullying and/or harassment, or even stalking
- insulting, harassing or attacking others or using obscene or abusive language
- deliberately wasting printing and Internet resources
- intentionally damaging any devices, accessories, peripherals, printers or network equipment
- committing plagiarism or violating copyright laws
- using unsupervised internet chat
- sending chain letters or spam email (junk mail)
- accessing private 3G/4G networks during lesson time
- knowingly downloading viruses or any other programs capable of breaching the department’s network security
- using the mobile device’s camera anywhere a normal camera would be considered inappropriate, such as in change rooms or toilets
- invading someone’s privacy by recording personal conversations or daily activities and/or the further distribution (e.g. forwarding, texting, uploading, Bluetooth use etc.) of such material
- using the mobile device (including those with Bluetooth functionality) to cheat during exams or assessments
- take into or use mobile devices at exams or during class assessment unless expressly permitted by school staff.

In addition to this:

Information sent from our school network contributes to the community perception of the school. All students using our ICT facilities are encouraged to conduct themselves as positive ambassadors for our school.

- Students using the system must not at any time attempt to access other computer systems, accounts or unauthorised network drives or files or to access other people’s devices without their permission and without them present.
- Students must not record, photograph or film any students or school personnel without the express permission of the individual/s concerned and the supervising teacher.
- Students must get permission before copying files from another user. Copying files or passwords belonging to another user without their express permission may constitute plagiarism and/or theft.
- Students need to understand copying of software, information, graphics, or other data files may violate copyright laws without warning and be subject to prosecution from agencies to enforce such copyrights.
• Parents and caregivers need to be aware that damage to mobile devices owned by other students or staff may result in significant consequences in relation to breaches of expectations and guidelines in the school’s Responsible Behaviour Plan.

• The school will educate students on cyber bullying, safe internet and email practices and health and safety regarding the physical use of electronic devices. Students have a responsibility to incorporate these safe practices in their daily behaviour at school.

The school’s BYOiPad program supports personally-owned iPads in terms of access to:
• printing
• internet
• file access and storage
• support to connect devices to the school network.

However, the school’s BYOiPad program does not support personally-owned iPads in regard to:
• technical support
• charging of devices at school
• security, integrity, insurance and maintenance
• private network accounts.
Responsible use agreement

The following is to be read and completed by both the STUDENT and PARENT/CAREGIVER:

- I have read and understood the BYOiPad Charter and the school Responsible Behaviour Plan.
- I agree to abide by the guidelines outlined by both documents.
- I am aware that non-compliance or irresponsible behavior, as per the intent of the BYOiPad Charter and the Responsible Behaviour Plan, will result in consequences relative to the behaviour.

Frequently Asked Questions

2015 BYOiPad Program for Year 7 and 8s.

General
Q - Is this mandatory?
A - We expect all Year 7 and 8 students to have a working iPad as part of their toolkit.

Q - Will I be expected to purchase a brand new iPad?
A - No, you can choose to use an iPad that you already own or purchase a used iPad.

Q - Why only allow iPads and no other mobile devices or laptops?
A - We believe in a consistent approach to ensure best productivity with regards to maximising student learning outcomes.

Q - If this is mostly for the storage of e-books, why cannot other products be used? Are there other things that this will be used for, if it is for school work then surely a tablet or laptop with a better keyboard may be a better choice?
A - We anticipate using the iPad well beyond storage of e-books or, indeed digital textbooks. Excessive typing is not a planned part of our iPad usage and, when necessary, small Bluetooth keyboards or the onscreen keyboard should be sufficient.

Q - What in-school support do the students have for devices?
A - The school will be providing support through:
  - Provision of high-speed Wi-Fi services
  - Technical support for log-ins and network issues
  - Secure places to store the iPads when not in use
  - Identification and installation of high-quality apps and texts
  - Education in using iPads productively, effectively, securely and ethically.

Q - We already own several tablets (not Apple) and I am loathing purchasing another one. If the school is looking to widen this, why limit it to one type of product now? Our child presently takes a tablet to school (State School) and it has operated with no problems using their network.
A - We have identified a number of key factors for the success of our ‘Bring Your Own Device’ (BYOD) program, including:
  - Device homogeneity to reduce networking and technical support costs
  - Prior resourcing (and learning) of teaching staff who all have iPads for curriculum and administrative purposes
  - Cost relative to most other devices
  - Quality of existing (and, we expect, future) applications to support learning
  - Ease of use, including rapid logon times to reduce lost curriculum time
  - Suitability for pedagogical transformation, rather than lower level substitution of existing teaching practices

Q - Are students encouraged to sit at desks to use technology or is it really mostly used on the floor or on sofas?
A - Desks are used most of the time. It depends on the activity. Only sitting at desks is not healthy either. Regular movement is ergonomically desirable.
Q - How are iPads managed outside of class? Is there a policy that their use is restricted to inside class only or inside the library during lunch?
   A - Their use is restricted to in class only or supervised lunchtime spaces such as the library.

Learning
Q - If we choose not to be part of this will this then affect the class group my child is placed in?
   A - We do not expect any classes in Year 7 and 8 to be non-iPad.
Q - How much of the day will the iPads be used? Will the students still be using pencil and paper as well as handwriting?
   A - We envisage that the iPads will be used between 25-75% of the school day and yes, we still see a need for students to use pencil and paper.
Q - Will the school then require my child to have a different device in Junior Secondary and Senior Secondary (e.g. laptop)? These devices have a short life span and could not be passed onto another child starting school in a couple years’ time as the operating systems are quickly out dated and applications become redundant.
   A - Along with Years 7 and 8, we regard Year 9 as part of our Junior Secondary school and that the iPad program will roll-out into Years 7 and 8 in 2015 and 2016 respectively matching the expected three year life of most iPads. In the Senior School, more specialist subjects (e.g. Art, Music, Graphics, etc.) have required more specialist equipment and software based on both Apple and Windows formats and machines. It is very dependent on subject choice and, in this phase, user preference.

Technical
Q - Which iPad models?
   A –
   a. iPad 4th generation and onwards (2012+ models)
   b. 16GB minimum, 32GB recommended storage, Built-in Camera
   c. Latest iOS update. – currently iOS 8.0.1
Q - Which Apps?
   A - short list of included (from Apple), free and low-cost apps will be released towards the end of the year.
Q - Will the iPads be managed at home or at school e.g. loading apps, updating the device?
   A - The iPads will need to be managed at home. Each year level will have a list of apps that will be required to be loaded (most of which will be free). Parents can choose to load additional apps that are not necessarily required by the school.
